ABOUT ME

Full Stack WordPress Developer with 10+ years of professional experience designing, developing, and maintaining custom WordPress solutions for international clients. My work includes custom theme and plugin development, WooCommerce customization, website performance optimization, and ongoing maintenance for business-critical websites. I enjoy finding practical solutions to complex technical challenges and writing clean, maintainable code that supports long-term growth. Over the years, I've worked closely with designers, project managers, and distributed development teams to deliver reliable solutions on time while maintaining high development standards.

WORK EXPERIENCE

 **Kings Crest Global** – New York, United States

Senior WordPress Developer

[01/09/2021 – 31/03/2026]

- Developed custom WordPress websites, themes, and plugins from scratch based on client requirements and UI/UX designs.
- Built and maintained responsive, high-performance websites with a strong focus on speed, usability, and cross-browser compatibility.
- Customized WordPress themes, plugins, and WooCommerce functionality to deliver tailored business solutions across various industries.
- Optimized website performance using caching, database tuning, image optimization, and other best practices to improve Core Web Vitals and overall user experience.
- Diagnosed and resolved complex website issues, plugin conflicts, performance bottlenecks, and security-related problems.
- Managed ongoing website maintenance, feature enhancements, WordPress updates, and long-term technical support for client projects.
- Collaborated closely with designers, project managers, and developers to deliver projects on time while maintaining high code quality.
- Reviewed code, shared technical guidance with team members, and contributed to improving development standards and workflows.
- Assisted in planning technical solutions, evaluating implementation approaches, and recommending best practices for scalable WordPress development.
- Performed database optimization, backup management, and security hardening to ensure reliable and stable production environments.

- Worked with Git-based version control and deployment workflows to support efficient collaboration and smooth project releases.
- Researched new WordPress technologies, plugins, and development techniques to improve project quality and development efficiency.

NETMOW – Benowa, Australia

WordPress Developer

[01/04/2017 – 31/08/2021]

- Developed custom WordPress websites and plugins from scratch based on client requirements and business objectives.
- Customized existing WordPress themes, plugins, and website functionality to meet project-specific needs.
- Maintained client websites by implementing new features, fixing bugs, troubleshooting technical issues, and performing regular updates.
- Improved website performance by optimizing page speed, Core Web Vitals, database queries, images, and caching configurations.
- Built responsive email templates and managed email marketing campaigns using Mailchimp.
- Applied security best practices, performed routine backups, monitored website health, and resolved security-related issues to keep websites stable and secure.
- Worked directly with clients to gather requirements, provide technical support, and deliver solutions that aligned with their business goals.
- Tested websites across multiple browsers, devices, and screen sizes to ensure a consistent and reliable user experience.
- Performed debugging, quality assurance, and pre-launch testing to identify and resolve issues before deployment.
- Collaborated with designers and developers throughout the development process to ensure projects were delivered on time and met quality standards.
- Managed website deployments, content updates, and ongoing maintenance for clients across a variety of industries.

Mediusware – Dhaka, Bangladesh

Web developers

[01/01/2016 – 31/03/2017]

- Converted UI/UX designs into responsive, pixel-perfect websites using clean, well-structured front-end code.
- Developed and customized websites based on client requirements while maintaining code quality, responsiveness, and cross-browser compatibility.
- Added new features and enhanced existing functionality to improve usability and meet evolving business needs.
- Identified and resolved bugs, layout issues, and technical problems through regular testing and debugging.
- Optimized website performance by improving page speed, reducing unnecessary assets, and following front-end best practices.
- Worked closely with designers, project managers, and developers to ensure projects were delivered accurately and on schedule.
- Provided technical support, implemented content and functionality updates, and maintained existing websites.
- Participated in code reviews, tested websites across different browsers and devices, and ensured a consistent user experience before deployment.

Instalogic BD – Dhaka, Bangladesh

Junior Web Developer

[01/08/2014 – 19/12/2014]

- Converted PSD and design mockups into responsive, pixel-perfect HTML/CSS layouts while maintaining design accuracy across different screen sizes.
- Built clean, semantic front-end code using HTML, CSS, JavaScript, and jQuery for seamless integration into WordPress websites.

- Ensured cross-browser compatibility and responsive layouts to provide a consistent user experience across desktop, tablet, and mobile devices.
- Assisted senior developers with front-end implementation, website updates, and UI enhancements throughout the development process.
- Implemented interactive user interface elements based on project requirements while following established coding standards.
- Tested web pages across different browsers and devices, identified layout issues, and fixed front-end bugs before project delivery.
- Optimized page layouts, images, and front-end assets to improve website performance and loading speed.
- Worked closely with designers and the development team to deliver high-quality websites within project deadlines.
